Experience

Luminar Technolab | kochi, kerala
Intership Trainee | 10/2023
I am currently interning in the MERN stack, where I am gaining practical experience and knowledge in software development while working on real-world projects and collaborating with experienced developers.

Freelance Web Developer
Software Developer | 02/2022 - Present
Designed and developed the DAAKOAF Procurement Solutions website, collaborating remotely with the client to enhance their online presence and user engagement.

As a freelance web developer, I had the privilege of collaborating remotely with DAAKOAF, a leading Procurement Solutions provider in the Kingdom of Saudi Arabia. The project aimed to revamp their online presence by creating a user-friendly website that highlighted their diverse range of services, from project management to waste management.

Personal Projects

- **Web Based Chat Application (2022)** A web chat is a system that allows users to communicate in real-time using easily accessible web interfaces. It is a type of Internet online chat distinguished by its simplicity and accessibility to users who do not wish to take the time to install and learn to use specialized chat software.
- **Baby Caring Aid With The Application Of Analysis On Live Video Using Machine Learning (2023)** The baby caring aid system is designed to provide real-time assistance to parents and caregivers in caring for an infant. The system uses Convolutional Neural Networks (CNNs) to analyze live video of the baby and make predictions about the baby's care situation.
- **DAAKOAF Procurement Solutions Website(2023)** Designed and developed a comprehensive website showcasing DAAKOAF's range of procurement services, leading to increased engagement and organic traffic.
- **Portfolio Website :** This website is a testament to my expertise in HTML, CSS, and JavaScript, as well as my commitment to creating engaging and interactive online experiences.   https://mhdportfolio.netlify.app/
